

PROFILE

Full-stack engineer building production SaaS applications with React, TypeScript and Node.js. Experienced in owning features end-to-end, designing scalable systems and delivering AI-powered products used by real customers. I enjoy solving complex problems and turning ideas into reliable software.

EXPERIENCE

FOUNDER & FULL STACK ENGINEER

Plink • 2026–Present

- Built and launched a production SaaS for board game score tracking.
- Designed backend architecture using Supabase and PostgreSQL.
- Integrated Stripe subscriptions and Apple In-App Purchases.
- Published iOS mobile app using Capacitor.
- Implemented collaborative multiplayer features and analytics dashboards.

FRONT-END DEVELOPER

Giosg • 2024-2026

- Owned customer-facing features across multiple SaaS products, collaborating closely with product managers, designers and engineers from discovery through production.
- Built reusable frontend architecture and design system components adopted across projects.
- Developed AI-powered conversational experiences and AI agent workflows, integrating generative AI into production customer interactions.
- Improved engineering quality through testing, internal tooling and code reviews.

FULL-STACK DEVELOPER

Athlos Travel • 2023-2024

- Delivered a production booking and event management platform for leading Spanish sports clubs, including FC Barcelona, supporting travel, event operations, and ticketing workflows.
- Architected and developed backend services with NestJS and PostgreSQL, creating secure, scalable APIs and a maintainable domain model.
- Established the project's frontend architecture and reusable design system with Chakra UI, and deployed the application on AWS to support reliable production releases.

SKILLS

React • TypeScript • Node.js • Next.js
NestJS • Remix • PostgreSQL • Prisma
REST APIs • Swift • Supabase • AWS
Docker • TanStack Query • Playwright
Jest • Capacitor • Stripe • OpenAI APIs
Generative AI • CI/CD • Storybook

LANGUAGES

Italian - Native
English - C1
Spanish - B2
French - A2

EDUCATION

Immersive Full-Stack Software Engineering Bootcamp

Codeworks Barcelona • 2023

- Intensive 12-week programme covering full-stack web development.
- Built multiple production-ready applications using React, Node.js, PostgreSQL and modern development practices.
- Focused on agile development, pair programming, testing and collaborative software engineering.

Diploma in Foreign Languages

Liceo Linguistico Giuseppe Mazzini
Italy • 2013–2017

SIDE PROJECTS

Pagekind - AI-powered collaborative memory albums. *(In development)*

AI Quiz Generator - LLM-powered quiz generation with adaptive difficulty.

Notch Prompter - Native macOS teleprompter using the MacBook notch. Built in Swift.
